Introduction

It is with pleasure that we present to the plumbing trade Catalog "H", the largest and most complete book we have ever issued.

"Southern Beauty" Enameled Ware has long been noted for quality, beauty and originality, and the recent addition of a number of handsome tub patterns makes our line compare favorably in size with any on the market.

The illustrations shown in this book are printed from the highest grade of half-tones and are exact reproductions of the fixtures themselves set up for use.

On account of the fact that a great many new patterns have been added since catalog "G" was issued we found it necessary to change our plate numbers. Complete list of old and new numbers will be found on page 230.

Roughing-in measurements are not shown in this book, but booklet giving roughing-in measurements of all fixtures illustrated will be furnished upon request.

The material entering into the manufacture of our ware is the best that can be procured, our equipment in all departments is the most modern, and, while "Southern Beauty" enameled ware has always been recognized as second to none, we are constantly making improvements, which insures our customers always getting the best enameled ware it is possible to make.

That our policy is appreciated by the plumbing trade and the public generally is shown by the constantly increasing demand for "Southern Beauty" Enameled Ware.

GUARANTEE LABEL

Each piece of "Southern Beauty" Enameled Ware bears the above Guarantee Label and also has the name "Cahill" cast on the exterior. This label is an assurance of absolute satisfaction.

"Southern Beauty"

Suwanee and Low Suwanee Baths

The Suwanee Bath is made two heights. Height of regular pattern is 22 inches from bottom of bath to top of rim, and height of low pattern is 18 inches from bottom of bath to top of rim, which, after allowing $\frac{1}{2}$ inch for tiling into floor, makes distance from floor to top of rim $21\frac{1}{2}$ inches and $17\frac{1}{2}$ inches respectively.

The above cut shows relative heights of regular and low patterns.

All other dimensions and prices are the same.

If low pattern is wanted, always so specify, as otherwise regular pattern will be furnished.

Suwanee Bath Tubs

Diagrams Showing Drillings

On this and the page following we show different ways in which the SUWANEE bath can be drilled. These drillings apply to both regular and low patterns.

We also give plate numbers and show the different methods of installation to which the SUWANEE bath adapts itself. SUWANEE bath tubs can be furnished with fittings as follows: Plate H-5000, H-5010, H-5020, H-5025, H-5030, H-5035, H-5040, H-5050, H-5060 and H-5070.

When ordering always specify plate number of bath and fittings.

When low pattern SUWANEE bath is wanted, always so specify, as otherwise regular pattern will be furnished.

Pacific Plate H-3065—Patented

Sectional view showing construction of Pacific sink and laundry tray combination in one piece.

Special attention is called to the fact that while the sink and laundry tray are cast integral, the construction prevents any damage to the enamel from expansion and contraction when the laundry-tray is filled with hot water and the sink with cold, or vice versa, the sink and tray each having a partition with a space between the two. When laundry tray is not in use the ash drainboard is placed over it, making a most satisfactory sink and drainboard combination.

Plate H-3210—Patented

Sectional cut showing construction of two-part laundry tray.

Special attention is called to the fact that while this fixture is made in one piece, each tray has partition with space between. This overcomes the greatest drawback to the use of two-part trays, viz: the effects of expansion and contraction, which frequently damage two-part trays when one tray is filled with hot water and the other with cold. We originated this construction, and the pattern is most satisfactory where a two-part laundry tray is specified.

List of "G" and "H" Plate Numbers

On account of the numerous patterns added to the "**Southern Beauty**" line since catalog "G" was issued we found in compiling catalog "H" that it would be necessary to change our plate numbers. The new numbers can be easily adopted by the trade, as in most cases the change consists only of the addition of "0", Plate G-130 becoming H-1300, etc. Lavatories drilled for bi-transit waste are changed by the substitution of the figure "1" for "½", Plate G-130½ becoming H-1301, etc.

Complete list of "G" plate numbers with corresponding "H" numbers are as follows:

Special Notice

Inspection

All goods are packed, checked and inspected by competent men and leave our factory in good condition.

Damaged Goods

When goods have been shipped and receipted for in good condition by the transportation company, shipment at once becomes the property of the consignee and our responsibility ends. Consignee should carefully examine all shipments and refuse to accept goods in bad condition without a notation to that effect being made on freight receipt by the freight agent. Transportation companies do not recognize claims for damage unless proper notation is made on freight bill.

Defective Goods

Our goods are fully guaranteed against any defect in manufacture, and we replace any found defective. However, we do not allow claims for labor or consequential damages.

Returned Goods

Goods must not be returned without our permission. If necessary for any reason to return goods, identification tags will be furnished on request.

Cancellations

We do not accept cancellations or changes on orders for special goods after work has commenced.

Contracts

Are subject to delays on account of strikes, accidents or other causes beyond our control.

Promises of Shipment

Are estimated as accurately as possible. We always use our best efforts to ship within the time specified, but cannot guarantee to do so.

Prices

Whether net or list and discount are subject to change without notice.
